

Task 8

1. **Scan provided QR code:** This is the first step where the student scans a provided QR code to start the feedback process.
2. **Fill in student id:** After scanning the QR code, the student is prompted to enter their unique identification number.
3. **Rate the lecture:** The student then rates the lecture on a scale (the scale isn't specified in the diagram).
4. **Write open feedback (conditional):** the student has the option to provide additional comments about the lecture.
5. **Submit feedback:** The student submits their feedback, which includes their rating and any additional comments.
6. **Check authorization:** The application checks if the student is enrolled in the course. If the student is not enrolled, an error message is logged. If the student is enrolled, the process continues to the next step.
7. **Validate Feedback Fields:** The application checks if the feedback provided by the student is valid. If the feedback is invalid, an error message is logge. If the feedback is valid, the process continues to the next step.
8. **Save Feedback:** The valid feedback is saved in the system.
9. **Log success message:** A success message is logged indicating that the feedback was successfully saved.
