

**Group 1:** Arman Yerkeshev, Anna Linden, Golavskiy Artur, Pham Dung

**Actors:**

**Teacher:** A teacher sets up and changes courses and lessons in the system. They help make learning better.

**Student:** A student learns from the courses and tells the teacher how they feel about the lessons, helping to make them better.

**What They Can Do:**

**For Teachers:**

- **Sign Up:** Teachers can make their own account to start using the system.
- **Log In:** Teachers can get into their account to work on their courses and lessons.
- **Add New Courses:** Teachers can create new courses for students to take.
- **Remove Courses:** Teachers can delete courses that are no longer needed.
- **Change Courses:** Teachers can update the info on courses to keep them fresh and useful.
- **Add New Lessons:** Teachers can put in new lessons for more detailed learning.
- **Change Lessons:** Teachers can update lessons to make them better based on what students need.
- **Remove Lessons:** Teachers can delete lessons that aren't needed anymore.
- **Make QR Code:** Teachers can make a QR code for lessons so students can easily join or give feedback.

#### **For Students:**

- **Scan QR Code:** Students can use the QR code to quickly join lessons or access materials.
- **Give Feedback:** Students can tell what they think about the lessons, helping to improve the course.

This way, teachers organize the learning, and students help make it better by sharing their thoughts.
